

Stair edging profiles for tiles and natural stone surfaces

Stair edging profiles for parquet, laminate, carpeted and linoleum floors

# Stairs have to be safe!

Stair edging profiles with special inserts

› Steps and stairways are a big challenge for any architects, designers or builders.

They need to look good but must also be safe to walk on and easy to climb.

› DURAL is now turning them into a “stairway to enhanced architecture”, versatile room features which combine aesthetics and functionality in safe and durable fashion, step by step.

# TREDSAFE

Safe grip on any floor surface

Stair edging profiles for any stair covering. Non-slip category R10/V4

› **TREDSAFE – for carpets:** Thanks to their integrated slots, these TREDSAFE profiles are especially suitable for laying self-adhesive carpeting.

› **TREDSAFE – for tiles and natural stone:** A chamfered rear edge means that these stair edging profiles provide extra non-slip safety on uncovered steps and reduce the risk of tripping, while also enhancing the look of the stairs.

› TREDSAFE stair edging profiles ensure maximum safety with any stairway floor covering, indoors or out, thanks to their non-slip DIAMONDTRED inlays.

### Top-selling colours

106 Neutral Black

113 Mid Grey

### Top-selling profiles

Other profile models available on request.

➤ **TREDSAFE - Linoleum/parquet/laminate:**

These TREDSAFE profiles ensure a high degree of safety on any stairs with linoleum covering. They are also equally suitable for self-adhesive floor coverings. There is a choice of PVC for any interior installation or anodised aluminium for indoors or outdoors. There is a large selection of profiles for steps in all shapes and sizes.

101 Safety White	106 Neutral Black	111 Royal Blue
116 Night Glow	102 Safety Yellow	107 Charcoal Grey
103 Safety Green	108 Light Grey	112 Burgundy
104 Safety Red	109 Rich Brown	113 Mid Grey
117 Super Night Glow	105 Safety Blue	114 Jade Green
	110 Putty	119 Chevron

➤ **DIAMONDTRED – 17 bright or pastel colours.**

➤ One special colour, **Night Glow**, lights up for several minutes after the light has darkened and thus provides extra safety if all goes dark due to a power cut, for example. **Night Glow** is suitable for any indoor location. **Super Night Glow** has special synthetic pigments that allow it to fluoresce for up to one hour and is suitable for both indoor and outdoor use.

Installation of DIAMONDTRED on granite with a cut groove

➤ **DIAMONDTRED** is the vital core of the Tredsafe profiles and offers unique product benefits:

- Excellent non-slip properties in the dry or in the wet.
- Resistant to discoloration by sunlight, oils, grease, petrol, salts, acids, alkalis or cleaning agents.
- Simple installation thanks to self-adhesive back.
- Retains shape even under tension.
- DIAMONDTRED can also be laid separately without the use of a profile.

119 Chevron, a special colour ideal for warning applications

TREDSAFE makes it easy to cover over old and damaged floor coverings

Bright colours to provide levels of warning in any situation, e.g. in buses etc.

4 widths of inlay

Standard colours for all design requirements

Aluminium and stainless steel stair edging profiles for tiles and natural stone

## FLORENTOSTEP

Tough, gleaming metal with a high-gloss finish. Stair edging profiles with an extra-wide base.

- › With their high loading capacity and secure grip, Florentostep profiles are ideal for protecting stair edges in any location, indoors or out, in private dwellings, in offices or public buildings. The extra-wide base is perfectly matched for any height of profile and provides the stairs with additional and durable safety. Available in aluminium, brass and stainless steel with a variety of high-quality finishes.

## DURASTEP DP

Excellent edging for a perfect finish to stairs or worktops.

- › The outstanding looks and tough aluminium design make these stair and edge profiles the perfect all-rounders for kitchens as well as any kind of steps or stairways. Along with end caps and both internal and external corner pieces, they provide superb edging with profile sizes for tile-heights of 9, 11 and 13.5 mm.

Stair edging profiles with solid wood step surface for tiled or natural stone surfaces

# DURASTEP WOOD

Stair edging profiles with solid wood step surface. Mediterranean inspiration for indoors and out.

> DURASTEP WOOD profiles for indoor locations are made of fine-grained European oak. The profiles for exteriors have a chunkier design and are made of especially hard wood.

T-COVE coving profiles made of solid aluminium

Stair-edging profiles  
for tiles and natural  
stone with parti-  
cularly good non-slip  
properties

## DURASTEP Standard

Tough standard step board – 25 mm wide.

› Individual stair-edging profiles with a step board made of non-slip PVC. DURASTEP Standard provides for unique looks while improving the safety of steps. The step board surfaces can be interchanged and are available in five colours.

## DURASTEP Jumbo

Stair edging profiles,  
35 mm in width with five-year non-slip guarantee.

› DURASTEP Jumbo is a robust stair edging profile for safe edging of tiled or stone steps. The unusual combination of soft and hard plastics ensures excellent non-slip properties along with stability and durability. The step surfaces can be interchanged. Ideal for any public or commercial locations.

## DURASTEP Solid

Safe aluminium and stainless steel profiles  
with grooved step surfaces.

› Superb looks and durable functionality are the hallmarks of these stair edging profiles which provide both protection and an effective finish to ceramic or natural stone steps.

laminate and parquet  
flooring

# STEPFLOOR

Perfect looks and functionality –  
ideal after renovations.

- STEPFLOOR is the perfect insert profile for laminate or parquet stair edges. STEPFLOOR G angled insert and edging profile.

STEPFLOOR

STEPFLOOR-G

# CLIPPER STEP

Variable stair edging profiles  
with no screws.

- For flooring heights from 7 mm to 14 mm. The solid aluminium top profiles have extremely hard treated surfaces. High loading capacity but easy to remove and replace at any time. The mounting clip fixes the top profile at the right height. A bottom profile with an extra wide base ensures safety of installation.

CLIPPER STEP

# PROTECT – TEKA

Screw-in or self-adhesive edging  
for stairs or elsewhere.

- PROTECT – angled profiles for installation in existing locations to protect edges. Made of aluminium or brass to be secured by adhesive or screws and also available with wood decoration.
- TEKA stair edging profile to trap carpets or linoleum and provide discrete edge protection. Made of silver anodised aluminium.
